## June 10-13, 2008 Saskatoon, Saskatchewan, Canada

The Fifth International Workshop on Mechanical Engineering Design of Synchrotron Radiation Equipment and Instrumentation (MEDSI) brings together experts in mechanical engineering design of synchrotron radiation equipment, to share the latest developments from various synchrotron radiation facilities.

The Fifteenth Pan-American Synchrotron Radiation Instrumentation Conference (formerly known as the National SRI Conference) seeks to promote exchange and collaboration among scientists and engineers associated with synchrotron research facilities in the Americas, through presentations and discussions concerning the production and utilization of synchrotron radiation.

**Abstract submission deadline: March 17, 2008**
