Description of work:

- 1) **Data Collection:** This package includes sample preparation, unit cell determination and data collection.
- 2) **Unit Cell Check:** This package includes sample preparation and unit cell determination. Database search is also included in this package.
- 3) **Complete structure:** This package includes sample preparation, data collection, space group determination, data reduction, absorption correction, structure determination and refinement. Database searches, and preparation of publication materials and **one hour of work** are also included in this package.
***Additional Work:** Additional work charges may apply for complex structures (client will be contacted if additional work is required) at \$175.00 per hour.

Researchers are asked to report any publications based on work performed, in whole or in part, at the Canadian Light Source or CLS@APS Program. The list of the publications reported to the CLS is in important factor in our funding and is taken into account during peer review of research proposals. For information on acknowledging the CLS and publication submission, [click here](#).

By signing and returning this form, the Client relinquishes the above listed samples to the Canadian Light Source Inc. and authorizes the above listed analysis. Client has read and is in agreement with the Canadian Light Source [Standard Terms and Conditions](#) which are hereby incorporated by reference. The foregoing shall not apply where CLSI and Client have executed a separate Service Contract in which case the Service Contract terms and conditions shall govern the work as described herein.
